◆ Fitting may be used in the drain line of a Temperature and Pressure (T&P) relief valve with a steam rating of 105,000 BTU/hr or less. ASME A112.4.1 requires a minimum inside diameter of 3/4 inch for water heater relief valve drain tubes; therefore, use 3/4 inch SharkBite fittings in T&P drain line applications in conjunction with Type L or M copper water tube after removal of PEX Tube Liner(s) from the SharkBite fitting.

Note: Model Numbers listed are base part numbers. Saleable items may include an additional 1-8 alpha/numeric characters after the base part number that indicate specific packaging configurations only.
